Follow me behavior (detection part) install of your source files

Olivier Aycard

Grenoble INP - PHELMA

GIPSA Lab

https://www.gipsa-lab.grenoble-inp.fr/user/olivier.aycard

olivier.aycard@grenoble-inp.fr

Follow me behavior (perception part):

1. The source files for this lab are located on your git at ensimag.fr
2. To access it, you need to run the UGA VPN. Type cisco anyconnect in the application search bar (top-left corner) and launch it.
3. Connect to vpn.grenet.fr
4. Select Etudiants INP, and enter your usual login information
5. Add a ssh key on your git on the gitlab of ensimag by following the instructions on slides 7 to 12 here :

6. https://ens_phelma.pages.ensimag.fr/www_info_1a_s1/#cours/progC.pdf

olivier.aycard@imag.fr

Follow me behavior (perception part):

1. cd ~/ros2_ws/src
2. \rm –r follow_me
3. git clone git@gitlab.ensimag.fr:seoc2a_robotics/*yourname*follow_me.git follow_me
   (to install the git repository in the folder "follow_me")

4. The git repository's files must be in the folder ~/ros2_ws/src/follow_me/
   - The **header** files are located in ~/ros2_ws/src/follow_me/**include**
     - Open datmo.h
   - The **source** files are located in
   - ~/catkin_ws/src/follow_me/**src**
     - Open detection_node.cpp (main file)
     - Open datmo.cpp (to implement your functions)
